Honorable guests,

It's a pleasure and honor for me, as a Cadet and the President of United Poles In America Enterprises, Inc. and as NJ State Cadets Director / Historian to be here today, to celebrate The Pulaski Cadets 30<sup>th</sup> Anniversary Military Ball, and express my best wishes and congratulations, from my lovely wife, my family, and the Board of Director of the United Poles In America Enterprises Inc.

As you may be aware that The Pulaski Cadets were revived in 1985 by the late General Jan Krepa and Colonel Tadeusz Dziekanowski, which marks the 182<sup>nd</sup> Anniversary of The first Pulaski Cadets Company that was sanctified in 1833 by General Casimir Pulaski's death at Savannah, in the cause of America's independence. It was fortified by the American's both Polish and non-Polish origin, who fought in World War I and 1920 for rebirth of Poland as an independent nation.

It was cemented by the joined struggles of the American and Polish military forces in World War II against Nazism. Today, Poland fights alongside of America in the War on Terror. All of us, whether called Polish-Americans or American Poles, are deeply pleased by the fact that America and Poland stand together again. It has been so ever since Pulaski and Tadeusz Kosciuszko served our fledgling nation, and it shall be so for many years to come.

The U. S. Congress in memory of General Casimir Pulaski, a man who believed in freedom for all, a hero of two countries. Historically, by an act of the U.S. Congress, October 11 is observed as "Pulaski Day" That is way, each year on first Sunday of October, hundreds of thousand marches and watches with Pulaski Cadets pay tribute in memory of General Casimir Pulaski up the Fifth Avenue in New York City each year.

Once again, I want to congratulate The Pulaski Cadets on your 30<sup>th</sup> Anniversary Military Ball, and express my best wishes and congratulations to all Cadets for their services; have a wonderful evening - and "God bless you" and "Sto Lat".

Thank You,  
Cpt. Tadeusz Brzozowski
